

With the purposes of monitoring the implementation of the District’s wellness policies evaluation policy progress, serving as a resource to school sites, and revising the policies as necessary, a District-wide nutritional committee is hereby established to develop, implement, monitor and review District-wide nutrition and physical activity policies. The Board specifically acknowledges that community participation is essential to the development and implementation of successful school wellness policies.

Following initial development, the committee would meet a minimum of three (3) times annually for continued assessment.

Committee membership will consist of:

- District Food Service Coordinator
- Parent representation from each school level
- Student representative from each school level
- Staff member representative from each school level
- Administrative Representative, Co-Chair
- Physical Education and Health Program Leader, Co-Chair

Appointments to the Committee will be made by the School Administration

Development

To help with the initial development of the district’s wellness policies, each school in the district will conduct a baseline assessment of the school’s existing nutrition and physical activity environments and policies. The results of those school-by-school assessments will be compiled at the district level to identify and prioritize needs.

Monitoring

The Superintendent or designee will ensure compliance with established district-wide nutrition and physical activity wellness policies. In each school, the principal or designee will ensure compliance with those policies in his/her school and will report on the school’s compliance to the school district superintendent or designee.

School foodservice staff, at the school or district level, will also ensure compliance with nutritional policies within school foodservice areas and will report on this matter to the superintendent (or if done at the school level, to the school principal).

The superintendent or designee will develop a summary report every year on district-wide compliance with the district’s established nutritional and physical activity wellness policies based on input from schools. That report will be provided to the school board and may also be distributed to school health councils, parent/teacher organizations, school principals, and school health services personnel in the district.
