

This policy supports the mission of the School District: Providing the environment that cultivates maximum student potential. Nutrition influences a child's development, health, wellbeing and potential for learning. To afford students the opportunity to fully participate in the educational process, students must attend school with minds and bodies ready to take advantage of their learning environment. This policy encourages all members of the school community to create an environment that supports lifelong healthy eating habits. Decisions made in all school programming need to reflect and encourage positive nutrition messages and healthy food choices.
